SUMMARY

Graphic Designer and Brand Identity Designer with 9+ years of design experience, beginning in 2017 and developing into an independent creative professional by 2019.

Experienced across branding, visual identity, digital design, print production, publishing, apparel graphics, and creative direction.

I have worked with printing and publishing businesses, clothing companies, churches, healthcare brands, creative businesses, and independent clients, giving me a strong understanding of both the creative and production sides of design.

My experience also includes managing design and print operations, developing brand identities, preparing artwork for physical production, and working remotely with clients and organizations. I currently work as a Co-founder / Creative Partner at Vetex Creatives, alongside ongoing freelance and remote design engagements.
